De usu & utilitate operis.

COmpegimus in unum volumen hanc Synonymorum, Epithetorum, Elegantiarum, Descriptionum & Comparationum supellectilem, habito delectu accurato ex optimis quibusque poëtarum monumentis, quæ adhuc prodierunt, ut esset vel compendium vel complementum omnium operum, quæ artis poëticæ principes elucubrarunt, præmissis variis de arte poëtica observationibus, & ejusdem praxi.

Elucet hic purioris latinitatis candor & significandi atque exprimendi vis, *vocum sinceritate & venustate phrasium expressus*, Copia vero & fœcunditas *rerum ad poëticam pertinentium tanta, ut, quidquid in multis authorum libris, quasi quibusdam rivulis, sparsim reperitur, ex hoc copioso fonte collectum inveniatur.* Ordo autem & rerum distributio *facilitatem & inveniendi rationem expeditissimam ostendit; adjecimus quantitatum omnium indices, notas & characteres, adhibita singulari diligentia, addita etiam poëtarum authoritate, quæ numeros probat &* Smetii *ac* Januæ musarum *vices supplet.*

III. *Syllaba brevis præcedens Encliticam* quĕ *nullo signo notatur, cum reipsa longa sit positione, licet brevis sit, si ab Enclytica separetur, v. g.* pŏpŭlusquĕ *loco* ĕt pŏpŭlŭs. *Quod si syllaba præcedens Enclyticam longa est, suo signo notatur, ut* pŏpŭlōsquĕ *loco* ĕt pŏpŭlōs.

IV. *Vocali, quæ præcedit finalem sequente vocali, nullam apposuimus notam, ut elisionem faciendam indicaremus.*

TRACTATUS BREVIS

De præcipuis Carminum generibus, & eorum materia.

CArmina in genere dividuntur præcipue in *Dactylica, Jambica, Trochaica, & Anapæstica*, ad hæc genera facile omnes species, quæ in usu sunt, revocantur. Materia carminum duplex est: *tenera, & gravis*; per illam intelliguntur *invocationes, acclamationes, gratulationes, descriptiones rerum venustarum, & narrationes eorum*, quæ affectum tenerum pro fine habent; per hanc intelliguntur *facta egregia, pericula navigationis, Heroum bella, pugnæ, descriptiones tempestatum, &c.*

INTER DACTYLICOS VERSUS

Primum locum obtinet *Hexameter*, constans sex pedibus, quorum quatuor primi sunt dactyli, spondei, quintus dactylus tantum, sextus spondeus, vel choreus; nam ultimus pes cujusvis est communis; si quinto loco spondeum habet, vocatur spondaicus, Materia ejus est gravis vocaturque *Heroicus*.

II.

Pentametrum carmen constat quinque pedibus, quorum duo primi sunt Dactylus vel spondeus, quos sequitur semipes, vel syllaba longa; deinde sequuntur dactyli & syllaba una. Subjicitur ordinarie Hexametro, idque alternatim, & tum vocatur carmen Elegiacum, destinatum primitus lacrymis, nunc tamen omnia fere argumenta complectens.

III.

Adonicum constat dactylo & spondeo.

IV.

Glyconicum constat primo loco spondeo (aliquando choreo, raro jambo) secundo & tertio dactylo.

V.

V.

Asclepiadeum carmen est sic dictum ab ejus authore Asclepiade, canstat primo loco spondeo, (raro dactylo) deinde dactylo & syllaba longa, tum duobus dactylis. Materia ejus est gravis & ordinarie una sententia.

VI.

Carmen Alcaicum duplex est, alterum constat primo loco spondeo, vel jambo; deinde jambo, & syllaba longa, tum duobus dactylis, ut: *Odi profanum vulgus & arceo:* alterum constat duobus dactylis, duobus choreis, ut: *Non generant aquilæ columbam*, illo incipiunt, hoc clauduntur strophæ Horatianæ, quæ materiam habent gravem, & unam plerumque sententiam.

INTER VERSUS IAMBICOS

Primas sibi vendicat *Senarius*, qui si purus est, constat sex jambis, si mixtus est, constat sequentibus pedibus, primo, tertio, & quinto loco recipit Jambum, Spondeum, Dactylum, Anapæstum, Tribrachyn, (raro proceleusmaticum) secundo, quarto, & sexto Jambum, & Tribrachyn tantum, quamvis sexto sive ultimo loco raro admittat Tribrachyn, Comici in his pedibus licentiores. Materia huius versus est heroior imo grandior.

Secundus est *Dimeter jambicus*, constans quatuor pedibus, nimirum primo loco & tertio habet Jambum, Spondeum, Dactylum, Anapæstum & Tribrachyn, secundo loco Jambum, & Tribrachyn, quarto Jambum tantum. Hoc carmen eleganter subscribitur alternis hexametris, & senariis jambicis, & tum pro materia habet omne argumentum, etiam heroicum, subscribitur etiam eidem versus Anacreonticus, at tum non admittit materiam heroicam, sed teneram.

Tertius est *Boëtianus*, constans Anapæsto, duobus Jambis & syllaba, ut *Habet omnis hæc voluptas &c.* hic versus perquam aptus est Rhytmis & servit materiis jucundis.

Quartus *Dimeter Archilochus*, constans quatuor pedibus, & una syllaba, quorum primus est jambus, vel spondeus, secundus jambus tantum, tertius est spondeus tantum, raro jambus, quartus est jambus cum syllaba, hic versus est tertius in ode Horatiana.

Quintus est *Scazonticus*, constans sex pedibus, quorum quintus est jambus, & sextus spondeus; reliqui, sunt iidem, qui senarii jambici.

DE VERSIBUS TROCHAICIS.

Horum versuum materia est tenera suntque perquam apti rhytmis.

Primus est *Euripidius*, constans tribus choreis, & syllaba, secundo loco etiam habet spondeum.

Secundus est *Alcmánius*, valde suavis, si debitum fluxum habeat, constatque quatuor pedibus, quorum primus est Choreus, aliquando pyrrhichius, secundus Choreus vel Spondeus, tertius Choreus tantum, quartus Choreus.

Tertius est *Sapphicus*, a Poëta Sappho sic nominatus, constat quinque pedibus, quorum primus est Choreus, 2dus spondeus (raro dactylus vel Choreus,) tertius est dactylus, quartus & quintus Choreus, ponitur vel solitarie, vel post singulos tres versus habet post se adonium

Quartus est Carmen phaleucicum, constans quinque syllabis, spondeo, dactylo & tribus Choreis.

DE VERSIBUS ANAPÆSTICIS.

Primus est *Archilochus*, qui Antonomastice vocatus *Anapæsticus*, constansque quatuor Anapæstis, vel pedibus comparibus, qui sunt vel spondeus, vel dactylus, vel proceleusmaticus, Materia ejus est grauis, diciturque ab aliis carmen *militare*, neque amat cæsuras, ut *Tertia misit buccina signum.*

Secundus est *Anacreonticus*, constans tribus pedibus, Anapæsto, Jambo, & Bacchino, ut *Age læta plaude turba*, Argumentum ejus est tenerum, & a nullo differt a *Boëtiano*.

Aliæ species carminum vel parum in usu sunt, vel eas apud Authores videre poteris.

Adseruntur observationes notatu dignissimæ.

1. Substantivo uni addas alterum, sed tale, ut prius debeat poni in Genitivo, Juxta Regulam: Quotiescunque, v. g. habes in carmine, coelum, aut polus; vel terra, vel mare, vel ventus &c. Addas illis unum substantivum, v. g. regia coeli; sidera, tecta, regna, coeli, aut poli, domus olympi, siderum domus, &c. Item dic: munera, vel gramina, vel viscera terræ, vel soli, aut: telluris opes, &c. dic: flumina, marmorea, æquora, procellæ ponti, aut maris, dic: flamina, furor, flabra, murmura venti, &c. utrique vel uni addas Epithetum, & carmen quodcunque facile erit confectum: pro exemplo sic hæc materia.

Dum video cælum; sperno terram.

Hexam. Dum video superi radiantia sidera cæli;
Noxia despicio perituræ munera terræ.

Pentam. Dum video superæ lucida regna domus
Rideo pulverei munera vana soli.

Adon.
Quando serena | Rideo vana
Cerno beati | Interituræ
Sidera cæli; | Munera terræ.

Hymen.
Quando micantia | Exitiabilis
Sidera fulgidi | Impia munera
Intueor poli; | Despicio soli.

Stropha Horatiana.
Dum luminosos sidereæ domus
Contemplor orbes, sperno volubiles
Telluris invitantis ausu
Divitias generosiore,

 Quan-

Quando festivi speciosa cœli
Stropha. Sapph. Astra contemplor, vitiosiora,
Quæ suis offert sceleratus orbis
Munera sperno.

Eodem modo ex eadem materia, mutatis fere solum Epithetis, Versus alii formari possunt.

2. Si materia desit, addi potest substantivo aliquod adjectivum, vel participium, regens aliquem casum tum illi casui novum adde Epithetum, si necesse sit; & Carmen in promtu erit. v. g. Sit faciendum carmen ex hac materia: Venit laurea, adde Epithetum regens casum, v. g. digna; huic adde casum, v. g. comis, capillis viro, &c. huic iterum adde Epithetum, & materiam sufficientem habebis, vel adde participium regens casum, v. g. laurea constans, vel parta cruore, sanguine, labore, &c. tum dices: Victoriosæ laurea dexteræ Condig a venit; dignus cum Genit. juxta observ. præpositam.

Vel:
Venit honoratis laurea digna comis. *Ovid.*
Vel:
Venit honoratis, generoso parta cruore,
Laurea, digna comis.

Si velis totum Distichon, repetitionem in Pentametro adhibe, juxta observationem 4. Cap. 2. & habebis:

Venit honoratis, generoso parta cruore,
Laurea digna comis, laurea digna viro.

3. Similiter attende ad adjuncta, v. g. *quis, quid, ubi, quibus auxiliis, quomodo*, &c. quando materia sufficiens carmini struendo deest: tum adjuncta illa, vel unum, vel duo, vel plura, prout necessitas exigit, interpone, v. g. sit faciendum Hexametrum ex hac materia; ubi hæc sum locutus. Quæras ex te, quibus auxiliis sim locutus; & statim occurret tibi: ore, lingua &c.

Deinde quæras: quomodo sum locutus? & dices, modeste, timide, audacter, &c. hæc adverbia muta, si necesse sit, vel in adjectivum, ut: timido ore, molesta lingua; vel in substantivum, v. g. cum timore. Ulterius quærere poteris: quid sum locutus? & dices: sermones, voces, verba, &c. tum interroga quæ & qualia verba sum locutus? & dices: multa, pauca, honesta &c.

Præterea quære: quis est locutus? & dices: ego timidus, audax, tristis, lætus, &c. omitte adjuncta alia. Ex his facile hæc carmina construes:

Hæc

Hæc ubi sum timidus tardo verba ore locutus,
Hos ubi sum lento sermones ore locutus,
Hæc ego dum dixi cum magno verba timore.
Hæc ubi sum furtim lingua titubante locutus.

CAPUT IV.

Observationes circa Versus in specie, ac primo circa Carmen Elegiacum.

1. Ordinarie post quodvis Distichon finitur sententia. Hoc tamen non est adeo necessarium, quin aliquando terminari possit in duplici puncto, ut sæpius fecit Ovidius.

2. Repetitio ejusdem literæ frequens in initio vitari debet:

O Tite tute, Tati! tibi tanta tyranne tulisti.

Neque probatur istud Ovidii in Metam.

Corpora Cecropidum pennis pendere putares.

Pendebant pennis. Et hoc in omni alio Versu observari debet.

3. Verba similiter desinentia, simul juncta, vitari etiam debent, contra quod peccavit Cicero, dum cecinit:

O fortunatam! natam, me consule, Romam.

Similiter vitanda est repetitio ejusdem literæ in fine; propterea non placet illud Propertii:

Et galea hirsuta compta lupina juba.

Nec illud Virgilii in Coppa:

Sertaque purpurea lutea mixta rosa.

Multo minus probatur carmen Leoninum, aliis forte intermixtum: Ovidius tamen aliquos Versus leoninos suis Elegiis immiscuit. Tale est illud:

Vir, precor, uxori, frater miserere sorori.

Ep. 8. *& istud, L.* 3. *Fast.*

Quærebant flavos per nemus omne favos.

Item sequentia:

Quot cœlum stellas, tot habet tua Roma puellas.
Ipse ego librorum video delicta meorum,
Nec nisi finita per plurima vulnera vita,
Si mihi quid prodest, hoc tibi, lector, obest,
Si Trojæ fatis aliquid restare putatis.

In Heroico tamen carmine hi versus locum non habent, quia videntur indigni heroica gravitate, nisi quis ex professo

mera pangat Hexametra leonina Virgilius unum hoc Leoninum Cyri habet quod deinde repetivit:

Magna Giganteis ornantur pepla trophæis.

4. Hexametrum male finitur monosyllabo (si ipsum non absorbeat syllabam præcedentem) vel quadrisyllabo; aut duobus monosyllabis. Habet quidem Virg. plura carmina his vocabulis terminata, nimirum:

Sternitur exanimisque tremens procumbit humi bos.
Lib. 5. *Æneid.*
Procubuit, viridique in litore conspicitur sus.
Lib. 8 *Æneid.*
Insequitur cumulo præruptus aquæ mons. *Lib.* 1. *Æneid.*
Grajus homo infectos liquens profugus Hymenæos.
Lib. 1. *Æneid*
Nunc te marmoreum pro tempore fecimus, at tu. *Id. Ecl.* 7.

Verum tirones hæc non imitentur. Neque hic audiendi sunt illi, qui conantur, nequidquam dare præcepta, quando Hexametrum terminari monosyllabo possit

Si tamen monosyllabum in fine obsorbeat præcedentem syllabam, terminari carmen monosyllabo potest, ut dictum est, ut:

Inde toro pater Æneas sic orsus ab alto est. *Virg. Lib.* 1. *Æneid.*

Et si duo monosyllaba non faciant cacophoniam, ut faciunt *at tu & me*, &c terminari etiam iisdem potest: unde non improbatur illud *Horatii*:

Principibus placuisse viris non ultima laus est.

Terminari itaque Hexametrum decet, vel dissyllabo, vel trisyllabo, vel etiam aliquando monosyllabo, si ipsum præcedentem syllabam absorbeat, tum etiam duobus monosyllabis, ut dictum est, sed caute

5. Pentametrum non bene finitur in a. v. g.

Hæc loquor: aut fama sollicitata nova. *Ovid. Ep.* 18.

Nec bene finitur in monosyllabo, unde vitiosum est hoc carmen:

.. Hæc a te dictaque factaque sunt *Catul.*

Idem intellige de Semipede primo Pentametri, unde non placet illud *Tibulli*:

O Dii! reddite mi pro pietate mea.

Si tamen Monosyllabum illud præcedentem syllabam absorbeat, nullum erit vitium,

Nec mora me miseram! filia clamat: ubi es: *Ovid.* 4. *Fast.*
Et *Ep.* 15. In qua tu nata es, terra beata mihi est.
Et alibi sæpius.

Simili-

Similiter nullum erit vitium, si monosyllabum illud præcedat aliud monosyllabum, ut:

Præmia si studio consequar ista, sat est. *Ovid.*

Nec bene finitur Pentametrum trisyllabo, ut fecit *Ovid.* Ep. 14.

Quæ tamen externis danda forent generis.

Bene tamen quadrisyllabo, aut Pentasyllabo; si ipsum non fiat sæpius, ut:

Unda simul miserum, vitaque deseruit. *Ovid. Epist.* 18.

Et *Ep.* 16.

Nec sedeo duris torva superciliis.

Sed tirones id ipsum caveant.

Pentametrum ergo terminari debet dissyllabo vel monosyllabo, priorem syllabam absorbente, vel duplici monosyllabo. Tirones, quantum fieri potest, terminent illud dissyllabo tantum.

6. Pentametrum non bene finitur nomine adjectivo. Excipe pronomina possessiva, meus, tuus, suus, quibus frequentissime finitur, ut:

-- Ite manus ad pia sacra meæ. *Ovid. L.* 5. *Strist.*
Edicti verbis nominor ipse tui. *Id. ibid. Eleg.* 3.
Implerent venti si mea vela sui. *Ibid.*

7. Hexametrum & Pentametrum est optimum, si cæsuras habeant; sive, si pedes inter se connexi, quasi catena, cohæreant, ut:

Semper honos, nomenque tuum, laudesque manebunt. *Virg.*

Vulgus amicitias utilitate probat. *Ovid.*

Contra illud pessimum est, quod vel nullam, vel unam tantum cæsuram habet, tale est illud Horatii:

Præter cætera Romæ me ne pöemata censes
Scribere.

Non tamen necesse est, ut in singulis digitis sit cæsura, nam in primo & quarto, tam in Hexametro quam Pentametro, item in quinto digito Hexametri vocabulum sine absurditate terminari potest, ut:

Assuit Alecto brevibus torquata colubris. *Ovid. Ep.* 2.
Linquor & ancillis excipienda cado.
Sed neque consului, nec te mea regia tangit. *Ovid. ibid.*
Et cecinit mœstum devia carmen avis. *Ibid.*

Præterea vitari debet, ne Hexametrum & Pentametrum

Penthemimeri careant, sive ne vocabulum in secundo pede finiatur; alias carmen fiet parum suave; tale est illud Horatii:

Non quivis videt immodulata Pöemata judex.

Nisi illud dissyllabum sit Pyrrichius & ipsum sequantur duo vocabula, quorum alterum sit Choreus, alterum Jambus, ut:

At lacrymas sine fine dedi, rupique capillos.
Ovid. Ep 3.

Sciendum etiam est, quod præ cæteris caesuris Trochaica semper reddat Hexametrum suave. v. g.

Excutiens cervice toros, &c. *Virg. L.* 12. *Æneid.*

8. In Pentametro vocabulum debet terminari in tertio digito, alias insuave fiet carmen Tale est illud:

Inque sinus afflictis fluit imber aquæ.

Præterea semipes ille non debet esse monosyllabum, ut dictum est observ. 5. in hoc cap. sed debet esse syllaba ex priore vocabulo relicta, ut:

Quæcunque ex merito spes venit, æqua venit.

9. Verba nimis longa, quæ Pentasyllaba excedunt, exesse ex carmine Hexametro & Pentametro debent, admittit tamen Hexametrum in quarto digito, incipiens Hexasyllabum, ut;

Sed fugit interea, fugit irreparabile tempus. *Virg. L.* 3. *Georg.*

Falleret indeprensus, & irremeabilis error, *Idem L.* 1. *Æneid.*

Et L. 2. *Æneid* habet: ineluctabile tempus.
L. 6. *Æneid.* habet: inextricabilis error.
L. 2. *Georg.* habet: inexorabile fatum.
L. 7. *Æneid* habet: ineluctabile fatum.
Simile verbum in primo digito posuit Statius:

Bellerophontæas indignaretur habenas,

Virg. L. 5. habet inexaturabile, Heptasyllabum, dum canit:

Junonis gravis ira & inexaturabile pectus.

Utrumque tamen carmen, tam Hexametrum, quam Pentametrum, admittit sæpe Pentasyllabum, ut:

Incustoditæ diripiuntur opes *Ovid*
Ingeniosus amor, desidiosus, &c *Idem.*

10. Inter Adjectivum & Substantivum eleganter aliquid interponitur, ut:

-- duro crepitant sub vulnere malæ. *Virg. L.* 5. *Æneid.*
Non ego deserto jacuissem squallida tecto:
Nec quererer tardos ire relicta dies. *Ovid. Ep.* 1.

Sæpe

Sæpe illud fieri non poteſt, præſertim in Pentametro, v. g.

Ante meos oculos pervigil anguis erat. *Idem Ep.* 12.

Unde tirones ſe hic non affligant.

11 Similiter elegantius eſt, ſi Adjectivum anteponatur Subſtantivo, ut:

Nec mihi quærenti ſpatioſam fallere noctem,
Laſſaret viduas pendula tela manus *Ovid. Ep.* 1.

Neque hoc fieri ſemper poteſt, unde nec hic tirones ſe affligant.

12. Tam Hexametrum, quam Pentametrum fit ſuavius, ſi a Dactylo incipiat, ut:

Arma virumque cano, &c. *Virg. l.* 1. *Æneid.*
Argolici rediere duces, altaria fumant,
Ponitur ad patrios barbara præda Deos. *Ovid. Ep.* 1. Item.
Ille meos oculos comprimat, ille tuos. *Id. ibid.*

Non tamen ullo modo reprobandi ſunt verſus, qui a Spondeo incipiunt, ſæpe enim a Dactylo incipere non poſſunt; neque ſemper a Dactylo incipere debent: tum quia materia Spondeum exigit, tum ut varietas habeatur, ſi carmen ſit longum.

13. Crebræ eliſiones in omni carmine vitari debent: unde perquam biulcum eſt hoc diſtichon, conſtans ſeptemdecim eliſionibus:

Tu ille ipſe es, quem ego amo intimo amore: iterum & me adamaoro.
At te ego anhelo? inde hæc ſunt metra biulca adeo.

Et illud Pentametrum *Catulli:*

Quam modo qui me unum, atque unicum amicum habuit.

Item illud Pentametrum in Epigrammate aliquo antiquo:

Te umbra petam; ergo nunquam, ne me metue, abs te abeam.

Imo ſunt, teſte *Balbino*, qui in carmine nullas volunt adhiberi eliſiones: verum hi audiendi non ſunt; nam non omnis eliſio ſemper vitari poteſt, neque vitari ſemper debet, materia aliquando eliſionem exigente. Adde, quod eliſiones cum ſale adhibitæ carmen Heroicum mirum quantum exornent. Tirones tamen, quantum poſſunt, ab eliſionibus caveant, ſemper enim fluxum carminis, ad quem præcipue hi attendere debent, quique in carmine Elegicco, Jambicis & Trochaicis, omnibusque aliis materiam teneram habentibus, maxime naturalis eſſe debet, impediunt, præſertim ſi vocalis a ſimili vocali, v. g. a ab, a, ut fit in hoc verſu *Virg. L.* 1. *Æneid.*

Omnes cælicolas omnes *ſupra alta* tenentes. Et in iſto:

Primus in arma rue, & clypeum cape.

Litera

Litera M. tuto elidi poteſt ab omnibus, cum enim ſit conſonans, non colliditur dure cum ſequenti vocali, neque multum impedit fluxum, ut:

Per tunicam, *ſqualentem auro*, latus haurit apertum. *Virg. L.* 10. *Æneid.*

Ergo hominum *quæſitum odium* mihi carmine, &c. *Ovid.*

Præſertim ſi M. elidatur, ut videatur corripi ſyllaba, quam terminat, more aliarum conſonantium, ut:

--- *Clamorem* ad ſidera tollant. *Virg. L.* 10. *Æneid.*
Tum lecti juvenes *certatim aræque* ſacerdos, &c. *Id. L.* 8. *Æneid.*
Et famam extingui veterum &c. *Id. L* 6. *Æn.*

Advertendum hic etiam, quod eliſiones mitigentur, ſi ſequens Vocalis, aut Diphtongus cum præcedente eliſa, in pedem ſive digitum antecedentem conveniat, ut:

Ora manusque ambas, &c. ſolioque invitat acerno.
Obſtupuere animis, &c.

Si eliſa Vocalis aut Diphtongus trahatur ad pedem ſequentem, durior fit verſus, ut patet ex his exemplis:

Poſcit equos *atque arma* ſimul.
--- Pelagi petere alta parabat.
Solve metus, atque hoc precibus ſine poſſe parentem
--- Ergo maria invia Teucris.

Vitanda autem præ cæteris eſt eliſio in initio carminis, ſi ipſum a monoſyllabo incipiat, ut:

Nam ut feruta cædes meritum majora ſubire, *Horat.*

Et apud *Catullum*:

Nam unus unguentum dabo. Et apud eundem:

Qui ipſe fui, &c.

Vitanda ſimiliter eliſio eſt in ultimo pede Hexametri & Pentametri, unde reprehenditur ab aliis hic verſus *Horatii:*

Et illud *Ovidii.*

Quadrijugos cernes ſæpe reſiſtere equos.

Hæc tamen eliſio Ovidiana eſt perquam apta materiæ, tironibus interim cavenda etiam.

CAPUT V.

Quænam obſervanda circa Carmen Heroicum.

PRæter ea, quæ ex obſervatis, C. præcedente huic carmini communia ſunt, obſerva:

1. Quod Carmen heroicum finiri ſingulis verſibus non debeat, ſed ad tres vel quatuor verſus trahi poſſit, ut:

Arma,

Arma, virumque cano; Trojæ qui primus ab oris
Italiam, fata profugus, Lavinaque venit
Litora multum ille & terris jactatus, & alto,
Vi Superum, sævæ memorem Junonis ob iram. *Virg. L.* 1 *Æneid.*

Neque necesse est, ut sententia finiatur in fine Versus, sed vel in initio, vel in medio Versus sequentis finiri potest, ut:

Vix ea fatus erat, geminæ cum forte columbæ
Ipsa sub ora viri; cælo venere volantes,
Et viridi sedere solo. *Vir. l.* 6. *Æneid.*

2. Pedes materiæ sunt aptandi. Hæc observatio extendatur etiam ad alios versus, qui similibus pedibus constat. i Si enim in hac sit mora, & colluctatio; aut difficultas exprimenda, si vehemens affectus; si tempus, si celeritas exponenda, Dactyli adhibeantur: ut ingeniose fecit Virgilius, nam expressurus vehementem desiderii affectum, ita cecinit:

Ducite ab urbe domum mea carmina, ducite Daphnim.

Expressurus cursum equorum *L.* 8 *Æneid,* ita:

Quadrupedante putrem sonitu quatit ungula campum.

De Ludis certantium *L. Æn.* 5. ita:

Inde ubi clara dedit sonitum tuba, finibus omnes
Haud mora prosiluere, suis: ferit æthera clamor
Nauticus.

Dum fugam describeret *L.* 11. *Æneid.* ita:

Ni fuga subsidio veniat, fugit ocyor Euro.

De tempore *L.* 10. *Eneid.* ita:

Stat sua cuique dies, breve & irreparabile tempus,

At dum luctantes ventos exprimere vellet, Spondeis est usus, utpote pedibus tardioribus, dum ait:

Luctantes ventos, tempestatesque sonoras.

Dum laborantes Fabros, *L.* 4. *Georg.* ita:

Illi inter sese multa vi brachia tollunt.

Dum languorem, *L.* 1 *Georg* ita:

Tum somni dules, densæque in montibus umbræ.

3. Carmen Heroicum amat verba & Epitheta sonantia, qualia sunt participia in ans & ens, præsentim obliqua; Item participia passiva præteriti temporis primæ conjugationis, tum etiam futuri temporis tam verbi activi, quam passivi

--- Trepidusque repente resurgit.
Attollentem iras, & cærula colla tumentem, *Virg. L.* 2. *Æneid.*
Illum indignanti similem, similemque minanti, *L.* 8. *Æneid.*

Bisque

Bisque triumphatas gentes, &c. *Id. L.* 3. *Georg.*
Pontemque indignatus Araxes, L. 2. *Æneid.*
Inspectura domus, venturaque desuper urbi. *L.* 2. *Æneid.*

CAPUT VI.

Observanda circa Carmen Horatianum.

1. Hoc Carmen, quia gravissimum est, delectatur verbis & Epithetis gravioribus. Sequentia alia apud Horatium invenies.

Intaminatus, formidolosus, tumultuosus, obliviosus, deprælian-tes habitabilis, conciliantibus, operosiores, vitiosiores, decolo-ravere, &c.

2. Primus versus Horatianus, idem est de secundo, est parum fluidus. *Primo:* si constet initio duobus dissyllabis, ut: *Licet, Mynax, styx,* &c. Et apud *Horat L.* 2. *Od.* 17. Ah! te meæ si, &c.

Secundo: Si in tertio digito sit monosyllabum; ut: Nil interest, an pauper &c. *Horat L.* 1. *Od.* 3

Tertio: Si careat Penthemimeri; hoc est, si ex tertio digito ejiciatur syllaba proiris vocabuli in quartum digitum, hoc modo:

Licet minax *orcus* fera prælia &c.

Et apud *Horatium L.* 1 *Od* 37.

Mentemque lymphatam Mareotico, &c.

Nisi illa syllaba absorbeatur a vocali sequenti, ut:
Quem si puellarum insereres choro. *Horat. L.* 2. *Od.* 5.
Eheu! cicatricum, & sceleris pudet. *Horat L.* 1. *Od.* 37.
Tu lene tormentum ingenio admoves. *Id. L.* 3. *Od.* 21.

Hoc tamen non imitentur tirones, ut fluxui Carminis consulant.

Quarto: Si ex sequenti vocabulo mutuo accipiatur syllaba, pro semipede in tertio digito, ut fecit *Horatius L.* 1. *Od.* 37.

Ante hac nefas depromere Cæcubum.

Pars posterior potest habere cæsuram, ut:

Justum & tenacem *propositi virum* &c.

Vel potest illa carere; ut:

Dixi Sacramentum: Ibimus, ibimus.

Non tamen habeat in fine monosyllabum, ut:

Ne forte credas interitura, quæ &c. *Horat. L.* 4. *Od.* 9.

Nisi ipsum a Vocali incipiat & præcedentem syllabam absorbeat. Initium ergo Versus Horatiani his aut similibus constet

constet vocabulis: Intaminatus. Non indecorus. Qualis minister Vides ut altum. Dissolve frigus. Dii me tuentur. Et musa cordi est. *Horatius.*

Finis his aut similibus constet:

Conciliantibus. Nec muliebriter. Æquor Atlanticum: Exitio gravi. Hunc fidibus novis Quidquid habes age, Filia pulchrior, dives & aureis. In mare Creticum. Nil fine te mei. *Horat.*

3. Tertius Versus Horatianus potest carere Triemimeri; hoc est; Verbum potest finiri in primo digito, ut:

--- *Et mero*
Tinget *pavimentum superbo. Horat.* L. 2. Od. 11.

Sed non debet sequi dissyllabum, alias hiulcum fieret Carmen Potest item carere Hephthemimeri, sive vocabulum potest finiri in tertio digito, ut:

Tentabo & arentes arenas.

In fine respicit monosyllabum, unde non multum valent hi versus:

Tentabo & arentes plagas, quæ &c.
Depone sub lauru mea: nec. Horat. L. 2. Od. 7.

Nisi monosyllabum illud elidat præcedentem vocalem. Tertius ergo versus Horatianus habet lectiones, aut iisdem similes.

Lenite clamorem sodales. Hæc constructio ex tribus vocabulis est Horatio frequentissima: ac propterea credo, quod Horatius in tertio digito non posuerit Jambum, ut scilicet fluxui carminis consuleret; cui consultum non esset, si tertio loco poneretur quadrisyllabum, aut trisyllabum, terminato in Jambo, ut:

Canemus inclyti trophæa
Principis, &c.

Huic constructioni æquivalet omnis illa, quæ loco trisyllabi habet dissyllabum cum monosyllabo, ut:

Cum mente nec turpem senectam, &c.

Ad arma cessantes, ad arma. Quod adeo observavit Horatius, ut in hoc versu rarissime habeat duo dissyllaba; & raro unum dissyllabum sine monosyllabo. Quare constructio illa est reliquis præferenda, æquivalent eidem sequentes:

Vexant inæquales procellæ, Ab insolenti temperatam. Morem

rem verecundumque Bacchum, Regumque matres Barbarorum. Si fractus illabatur orbis. Deprælιantes nec Cupressi. Non erubescendis adurit. *Horat.*

Sequentes non probantur:

Gaudes: apricos necte flores. Puer quis ex aula capillis,
Culpante nunc torrentia agros. *Horat.*

4. Ultimus Versus Horatianus fit valde suavis, si sequentibus modis construatur:

Divitiis potietur hæres.

Hæc conjunctio est Horatio perquam frequens, uti & sequentes:

Progeniem vitiosiorem. Et foliis viduantur orni. Nec virides metuunt colubros. Unda fretis tulit æstuosis. Digne puer meliore flamma. Dedecorant bene nata culpæ. Stravit humum sine clave victor. *Horat.*

Quare & præponendæ sunt sequentibus duabus:

Obstrepit Oceanus Britannis
Mitte supervacuos honores.

Priore tamen modo aliquoties Strophas claudit Horatius: Sequentes modos non imitentur tirones:

Jupiter ipse ruens tumultu. Me Cichorea, levesque Malvæ, &c.

In singulis Strophis non finitur necessario sententia, sed rejici potest pars illius ad sequentem Stropham, cum elegantia; ut:

Jam pauca aratro jugera regiæ
Moles relinquunt: undique latius
Extenta visentur Lucrino
Stagna lacu, Platanusque cælebs
Evincet ulmos *Horat.*

Non tamen rejicienda est syllaba ex priore Stropha ad sequentem, uti fecit *Horat. Od.* 12. *L.* 2.

Hospitis illa venena Colchi-
ca. Et quidquid usquam, &c.

Porro tironibus pro exemplo hæc Stropha *Horat L.* 3. *Od.* facile cæterarum elegantissima præscribi potest:

Virtus repulsæ nescia sordidæ,
Intaminatis fulget honoribus;
Nec sumit, aut ponit secures
Arbitrio popularis auræ.

CAPUT VII.

Observatio circa Carmen Jambicum.

Quod Versus Jambici, licet alios pedes, præter Jambos recipiant, non tamen admittunt unquam Trochæum; sicuti nec Trochaici admittunt Jambum.

2. Quod Versus Jambici, non Catalectici, qui destinati sunt materiæ jucundæ, vel rhythmis, sint elegantiores, si careant cæsura, ut:

Ave Virgo, Parens Dei,
Esto memor, rogo, mei.

Si tamen in fine ponatur trisyllabum, cæsuram requirunt, propterea suavior est hic Versus Jambicus Archilochius *Balde* de van. it. mundi:

Fuere Troes illium.

Quam iste: Fuit, fuit domus inclyta,

Jambici Catalectici cæsuram requirunt, unde suavior est iste Anacreonticus ejusdem Lib. citat.

Montesque fulminantur.

Quam iste: Pontes timent araxen.

Quod si alternatim ponantur versus Catalectici cum Acatalecticis, ut fecit *Balde* de van. mundi, jam Acatalectici non debent terminari dissyllabo, alias nullus erit fluxus Odarum, quia tum versus Catalecticus,; quia penultimam producit, si Acatalecticus terminaretur dissyllabo, jam uterque pari sono, & cadentia, uti ita loquar, terminaretur. Monosyllabo terminavit *Balde* Acatalecticos Jambicos septem, ut:

Alterna mors, Alterna sors,
Alterna fata trudunt.
Item. Deforme jam cadaver est.
Formosa Roma quondam.
Item. Cantantur hæc, plorantur hæc,
Scribuntur, & leguntur,
Videntur hæc, ridentur hæc,
Et lecta negliguntur, &c.

Dissyllabo terminavit quatuor; qui propterea non habent parem fluxum cum aliis, ut:

Si se videret in Tybri,
Puderet esse visam,
Item. Num vel manus, vel pes, tua,
Lysippe, sculptus arte.

Reliquos omnes terminavit vel trisyllabo, vel quadrisyllabo.

3. Quod versus Jambici (idem intellige de Trochaicis, & omnibus illis, qui in materia suavi versantur, aut rythmi) qui materiam teneram habent, debeant parcere elisionibus, ut dictum est supra *Balde* sex tantum elisiones habet in suis Jambicis de Van. mundi.

4. Quod idem versus Jambici, licet Anapæstos, aut Tribraches admittant, magis fluidi sint, si solis Spondæis, aut Jambis constent; patet hoc ex sequentibus versibus:

Elementa rerum diffident.
Idem. Jugulat Falerna Sardonyx.
Et. Ululatus aulicorum. *Balde.*

5. Quod Senarium Jambicum delectetur verbis, & Epithetis longis, & gravibus; est etiam carmen gravissimum. *Audiatur Seneca.*

Dii conjugales! *tuque* genialis tori
Lucina custos, In Med. Act. 1. Et:
——— *Pelle* fœmineos *metus*
Et in hospitalem Caucasum *mente indue. ibidem.*

Neque in singulis versibus finitur sententia necessario, sed eleganter protrahi potest per plures versus, & in medio finiri; ut:

Quis me per auras turbo præcipitem vehet.
Atraque nube involvet, ut tantum nefas
Eripiat oculis; *Sen.* in Thyest Act. 4.

6. Quod Senarium Jambicum (idem hic de Dimetro, si versetur in materia gravi) delectetur cæsuris, patet hoc cuivis Senecam legenti, ut:

Si steterit animus, si metu corpus rigens
Remittit animus, hæret in vultu trucis
Imago facti ferte me insanæ procul,
Illo procellæ, ferte, quo fertur dies.
Hinc raptus. *Sen.* in Thyest Act. 4.

In quinto digito eleganter terminatur verbum, ut:

Fortuna opes auferre, non animam potes. *Sen.* in Med. Act. 3.

Item:

Dii conjugales! tuque genialis tori
Lucina custos, quæque domitorem freti,
Tiphyn novam tranare docuisti ratem;
Et tu profundi sæve dominator maris, &c.

7. Quod Senarium Jambicum optime terminetur dissyllabo (vel Monosyllabo etiam, si priorem syllabam absorbeat) raro Quadrisyllabo, aut Trisyllabo. Excipe, quando Trisyllabum

bum elidit præcedentem syllabam; tunc enim cum elegantia, & gravitate carmen terminat, fecitque hoc Seneca frequenter. In monosyllabo, absorbente præcedentem syllabam, terminavit illud in Med. Act. 5.

——————— Causa fugiendi nova est Et Act. 5.

Pars ultionis ista, qua gaudes, *quota est*. Et alibi; sed rarius. In monosyllabo, non absorbente præcedentem syllabam: Ibid. Act. 4.

Cælo petam venena; jam nunc tempus est,

In quadrisyllabo:

Committe habenas genitor, & flagrantibus, &c.

Med. Act. 1.

Revocabo in alta conditam caligine, ibid.

In Pentasyllabo:

Ut dura cautes undique intractabilis,

In Hippol. Act. 2.

In Trisyllabo, absorbente priorem syllabam:

Quid anime cessas, sequere felicem impetum. In Hippol. Act. & alibi frequentissime.

In Trisyllabo, non absorbente præcedentem syllabam, terminavit carmen in Med Act. 2.

Si quod Pelasgæ, si quod urbes barbaræ, &c.

Et alibi non adeo frequenter.

CAPUT VIII.

Observanda quædam circa Versus Anapæsticos, & Trochaicos. Observa:

1 Quod Versus Anapæstici sint optimi, si nullam habeant cæsuram, & singuli pedes singulis vocabulis terminentur, ut:

Tertia misit buccina signum.
Nondum feræ nuncius horæ. *Sen.* in Thyest.

2. Quod similiter Versus Trochaici, ut fluidi sint, carere cæsura debeant, ut:

Eja Musa! sume plectrum,
Tange cho das, pange versus,

Versus tamen Sapphicus cæsuram requirit, ut:

Integer vitæ, scelerisque purus.

3. Quod Versus Trochaici, qui potissimum materiis jucundis destinati sunt carere elisionibus debeant, ut:

Crux fidelis inter omnes
Arbor una nobilis;

Silva talem nulla profert,
Fronde, flore, germine.

CAPUT IX.

De Epithetis.

EPithetorum magna in Carmine vis est, ut loquitur P. Masenius in palæstra Eloquentiæ L. 2. cap. 8. sive ad varietatem, ornatum, & copiam, sive ad deprimendam, extollendamve pro rei dignitate orationem; vis enim Metaphoram? dic cum Virgilio: Pontem indignatus Araxes? improba rabies, dona, munera Bacchica, tristis senectus, &c. vis Hyperbolen? dic: pernicius Euro, ferrea vox, turris æmula cælo, &c. Vis quantitatem ob oculos ponere? dic: vasti fluctus, immensum mare, immanis dolor, &c. vis qualitatem? dic: dulcia mella, vestis candida, labra tenera, &c. Vis patriam & locum exprimere? dic: Larissæus Achilles, Venus Cypria, Hircana Tigris, Marsus, Aper, vinum Massicum, &c. Vis similitudinem? dic: collum eburneum, dentes nivei, labra rosea, &c. adeo ut Epithetorum inveniendi facultas (verba sunt ejusdem Masenii) Poëtam propemodum faciat, & sterilitas asperantem excludat. Quam ob rem factum est, ut aliqui juventuti plurima præcepta obtruserint de Epithetis aptis inveniendis; sed quia in solis præceptis steterunt, juventutem parum adjuverunt: dic enim Adolescenti: pone in versu isto Dactylum Metaphoricum, aut Metonymicum &c. quomodo illum inveniet Tiro Discipulus, cum in ipso inveniendo laborat non raro Magister Poëta? At si Adolescenti Dactylos plures ob oculos ponas, eidemque dicas, ut ex illis aliquem materiæ præsenti, quam prius intelligat, aptum seligat: statim eundem inveniet; nisi fungus sit. Alii Adolescentibus (verba sunt ejusdem) libros Epithetorum sufficiunt, unde ad complendos versus idonea hauriant vocabula; at modum non ostendunt, quomodo juventus apta Epitheta seligere possit. Errare hos, dicit idem Autor, & bene; nam rudis juventus, nullis adjuta præceptis, sine discrimine quodlibet obvium arripiet vocabulum, ad hiatum carminis complendum maxime opportunum; parum sollicita, qua illud significandi gratia usurpetur. Ut duplici huic defectui subveniatur, primo hic ponam ordine aliqua ex singulis generibus Epitheta (omissis Participiis,) ut juvare se iis tirones possint. Deinde subjungam præcepta aliqua de usu Epithetorum. Ordine præcedunt:

CAPUT X.

De Usu Epithetorum.

SUnt, qui tradunt præcepta de Epithetis aptis seligendis; Ego, quæ circa usum præceptorum observavi, paucis indicabo. Itaque

OBSERVA 1. Quod uni substantivo tantum debeat addi unum Epithetum.

Excipe 1. Nisi illud Substantivum repetatur: tunc enim sicut cum illo Adjectivum prius repeti potest, ut: *Nuncia læta mihi; Nuncia læta tibi*, ita enim novum Adjectivum ei addi potest, ut: *Nuncia læta mihi, Nuncia mœsta tibi.*

Excipe 2. Nisi intercedat aliqua Conjunctio inter illa Adjectiva; v. g. Et, vel, Nec &c. ut:

Quique prius mollem, vacuamque laboribus egi
In Studiis vitam *Ovid.* 5. *Trist. Eleg.* 4.
Horrendum, & dictu video mirabile monstrum,
Virg. 3. *Æneid.*
Ille asper & improbus ira 9. *Æneid.*

Hæc Conjunctio sæpe omittitur, ut:
Monstrum horrendum, informe, ingens, *Id. Ibid.*

Excipe 3. Participia cujusvis temporis; hæc enim eidem Substantivo alio adjectivo adjungi possunt, ut:

--- Subjectisque ignibus atris. *Virg.* 11. *Æneid.*
Ut pia formosis addita thura rogis. *Ovid. Ep.* 7.
--- Lateque parentia duxi.
Mœnia, finitimis invidiosa solis. *Ovid Ep.* 7.
Mæsto flagrante tumultu. *Virg.* 11. *Æneid.*

OBSERVA secundo, quod Epithetum non debeat esse otiosum: sed debeat aliquid saltem clarius exprimere, quod ipsum Substantivum in se solo non exprimit. Porro Epithetum non tantum potest exprimere aliquid Substantivo suo conveniens, v. g. Turpis egestas; Tristis senectus; Amor ingeniosus,

fus, &c. sed etiam aliquid conveniens rei alteri, cum qua ipsum Substantivum est connexum. Ita *Ovid. Ep.* 1. canit.

Nec mihi quærenti spatiosam fallere noctem,
Lassaret viduas, pendula tela manus.

Ubi dicit, viduas manus, pro: manibus viduæ uxoris.

Idem:

Attenuant vigiles corpus miserabile curæ,

hoc est: curæ hominis vigilis.

Et *Virg.*

Memorem Junonis ob iram, pro: ob iram Junonis memoris.

OBSERVA 3. Quod Epitheta, quæ Tropum aliquem involvunt, præ cæteris sint deligenda; hæc enim & Poëtis sunt frequentissima, præsertim Meronymica, & reliquis elegantiora: ita *Horatius* cinerem vocat dolosum, glaciem inertem, ornos viduatas &c. per Metaphoram. Item Massicum vocat obliviosum, sicut *Ovidius* vocat sidera frigida, & *Martialis* favillas tristes, per Metonymiam.

OBSERVA 4. Quod Epithetum debeat semper materiæ præsenti esse accommodum; unde quæsiturus Epithetum, bene intelligat materiam, de qua agit; nam Epithetum, quod in alia materia est perquam accommodum, in præsenti sæpe est ineptum, & otiosum. Imo potest contingere, ut Epithetum cum Substantivo naturalis conjunctum in præsenti materia eidem non conveniat, in exemplo: ignis ex natura sua est calidus, & ad comburendum celer; si tamen Martyr cum igne expostularet; quod lente & tenuiter ureret, non deberet illum vocare rapacem & ferventem, sed lentum & frigidum. Ita nihil velocius est tempore, si tamen quereretur anima in purgatorio, se magnos cruciatus perferre, non deberet tempus, quo patitur, vocare velox, sed tardum; uti querebatur Penelope apud *Ovidium* Ep. quod viveret tardos dies. Hæc observatio est instar omnium, interim

OBSERVA 5. Quod Epitheta carmine Elegiaco & Heroico debeant esse usitata, & authoritate bonorum Poëtarum probata: in Carmine Lyrico, præsertim Horatiano, possunt etiam esse minus usitata, nova & audaciora.

CAPUT XI.

Praxis faciendi quodvis carmen facile & eleganter.

IN hoc capite manuducam tirones, & docebo practice, quomodo præscriptam sibi materiam facile in Carmen elegans cogere possint. Ex quo constabit etiam, quomodo Carmen aliud quodcunque facile & eleganter componi possit. Quod ut impetrem facilius, sequentia monere debeo:

Primo: Ut facturus Carmen observationes omnes supra de Versibus, tum in genere, tum in specie de illis, quos compositurus est, bene perspectas habeat.

Secundo: Ut materiam præscriptam bene intelligat.

Tertio: Ut facilem sibi usum Epithetorum faciat, eaque in promptu habeat, quod fiet, si eadem aliquoties per otium evolvit. Participia quivis formare noverit a Verbis, & comparativa, uti & superlativa a positivis.

Quarto: in promptu habeat, quomodo eundem pedem in diversis locis inveniet, v. g. desideras Choriambum; hunc invenies primo inter Pæones primos, non habentes incrementum, ut: instabilis, æthereus, &c. secundo eum invenies inter Dactylos, habentes incrementum breve, ut degeneres, dedecores, armigeri, &c. tertio eundem invenies inter Spondeos aliquos, ut: ancipites, dispartibus, supplicibus, &c.

Quinto: Facturus Carmen habeat in promptu illos Pedes, qui præsenti Carmini præcipue serviunt. Quare facturi Disticha in promptu habeant inprimis Jambos: ex his enim finis & medium Pentametri constat, v. g. ex Adjectivis: bonus, meus, cavus, ferus, &c. Deinde in promptu habeat illa Substantiva, ex quibus finis utriusque Carminis facile haberi potest, qualia sunt nomina Declinationis tertiæ, habentia incrementum breve pro Hexametro, ut: trames, dives, palmes, &c corpus, crimen, fœdus formido, munimen, &c, tum nomina in um, quæ numerum pluralem habent, ut: labrum, flabrum, flagellum, prælium, propugnaculum, &c. Item omnia nomina generis neutrius, ut: murmur, nomen, numen, fulgur, tonitru, &c. Ex his enim facile finis Distichi confici potest, v. g tramite longo, formidine fractus, divite vena, &c. murmura ponti, fulmina, murmura sæva maris; fulmina læva poli, flabra Noti, elisa tonitrua cælo, &c. Jam ad praxin pergamus.

§. I.

§. I.

Praxis faciendi Carmen Elegiacum.

Tirones primo sint solliciti, ut habeant finem Hexametri, & Pentametri. Pentametri finis ordinarie est Jambus, vel Pyrrichius, ut: Meus, fuit, poli, &c. ante hunc vel debet esse vocabulum quinque pedum, ut: Diripiuntur opes. Deseruisse juvat, &c. vel sint duo vocabula, quorum primum sit Dactylus, alterum Choreus, ut: Sidera clara poli, scribere jussit amor; vel quorum primum sit Choreus, alterum Amphibrachis, ut: Regina beata poli, vel denique sint tria vocabula, duo scilicet dissyllaba, & unum monosyllabum, ut: Laus tua victa jacet; de grege captus equus.

Finis Hexametri semper est carmen adonium, vel partim abscissum a pede præcedenti, ut: Aurora resurgit, domus omnipotentis olympi, vel non ita abscissum, ut: sidera cœli, unde tirones doceantur primo facere Versus Adonios & Hemistichia tum Hexametri, tum Pentametri; idque ex quavis re obvia, licet nullus sit in iis sensus, & miram postea facilitatem experientur in Distichis pangendis, v. g. ex hoc nomine: cœlum, faciant in primis Adonia, v. g. *Sidera cæli, Atria cæli, Regia cæli, Astra Polorum, Cælica sedes, &c.* tum Hemistichia, ut: *Regia beatorum, Divorum habitacula cælum, Divina palatia cælum, Domus omnipotentis Olympi &c.* tum faciant Hemistichia Pentametri, ut: *Sidera clara poli, Regna beata poli, Sidereæque domus, Regia magna Jovis, Ætherexque faces,* & ita de quavis re obvia. Tum procedant ad integra carmina concinnanda.

Facturus itaque Disticha, distingue materiam in duas partes, unum pro Hexametro, alteram pro Pentametro, & pro Adjectivis, relinque hiatus, postea implendos, v. g. sit Distichum faciendum ex hac materia ex Martiali desumpta:

Sic pisci indulget hamus; sic esca decipit feras.

Muta inprimis pisces ex numero singulari in pluralem, & habebis finem Hexametri, nimirum: piscibus hamus, tum materiam Hexametri ita scribe:

Sic vv- / -- [-- / vv-] indulget piſcibus hamus.

Ubi vides, quod pro utroque hiatu implendo debeas habere vel Anapæſtum, vel Spondeum; & quod pedes illos poſſis habere in Epithetis addendis tum ad piſcibus, tum ad hamus, hos pedes quære inter Adjectiva v v - vel in - - vel etiam inter Spondeos. Inter Tribraches invenies materiæ huic accommodos; avidus, cupidus, fatuus, ſtolidus, &c. inter Choreos invenies, bardus, brutus, cæcus, promptus, ſtultus, ſurdus, &c. inter Spondeos, vel etiam Choreos, pro hamus invenies: uncus, blandus, falſus, mendax, fallax, mordax, &c. ex his facile hos verſus conſtrues, & ſcribes:

Sic mendax fatuis
Sic ſtolidis mordax
Sic uncus cupidis
Sic avidis fallax } indulget piſcibus hamus.

Vel etiam ita ſcribe materiam:

Sic v v indulget v v - - piſcibus hamus.

Tum Epithetum pro hamus, quære inter Pyrrichios, & invenies: vafer, catus, vigil. Epithetum pro piſcibus quære inter Pæones tertios, vel inter Antibacchios, inter illos invenies: malecautus, maleſanus, peravarus, &c. inter hos invenies captivus, jejunus, furtivus, &c. tum carmina ſcribes ſequentia:

Sic vafer indulget meleſanis
Sic ferus indulget peravaris
Sic catus indulget furtivis } piſcibus hamus.

Ubi vafer & catus hamus eleganter ponitur, & hunc ſenſum facit: hamus piſcatorius, qui eſt vafer, catus.

Vel ita ſcribe materiam:

Sic v v - v v indulget piſcibus hamus.

Pro

Pro primo hiatu implendo quære Epithetum ad hamus inter Pyrrichios, ut ante. Pro secundo hiatu quære Epithetum ad piscibus, vel inter Antibacchios, vel inter Pæones primos a Vocali, & invenies: incautus, infaustus, insanus, &c. item: æquoreus, ambiguus, innocuus, &c. tum hoc carmen scribes.

Sic vigil æquoreis
Sic catus innocuis
Sic ferus incautis
Sic vagus infaustis, insanis, &c. } indulget piscibus hamus.

Materiam Pentametri ita scribe:

Sic -- / vv- [vv- / --] decipit esca feras.

Pro primo hiatu quære Spondeos suo loco, vel inter Choreos; Anapæstos vero inter Tribraches, vel suo loco Epitheta pro esca invenies sequentia: fallax, mendax, &c. Epitheta pro feras, invenies eadem, quæ antea pro piscibus, ut: stultus, avidus, cupidus, &c. tum hoc modo scribes carmen:

Sic fallax avidas decipit esca feras, &c.
Vel: Sic mendax faciles decipit esca feras, &c.

Vel ita scribe materiam:

-vv vv-
Sic -- decipit esca feras.

Et quære Epithetum pro esca inter Dactylos, & invenies: impius, invidus, obvius, callidus, noxius, subdolus, &c. ex his facies hoc Carmen:

Callida stultas,
Subdola brutas,
Noxia sic fatuas decipit esca feras.
Impia, &c. faciles, &c.

Vel etiam scribe materiam ita:

Sic ---- decipit esca feras.
vv---

Et

Et pro feras quære Epitheta inter Epitritos quartos, & invenies: improvisus, inconsultus, dementatus, &c. ex his facias tale Carmen:

Sic inconsultas decipit esca feras
Sic dementatas, &c.

§. II.

Eadem Praxis ostenditur in materia difficiliori.

PRo materia Distichi ut si. difficilior ista: Dum video cælum, desipit terra. Pro Hexametro designa: dum video cælum. Adde primo Substantivum nomini: cælum juxta Observ. supra datam sidera & cælum muta in genitivum, & habebis: sidera cæli. Tum hoc modo scribe materiam illam.

Dum video -- ⎧ *vv-vv* ⎫ sidera cæli.
vv- ⎩ --*vv* ⎭

Ubi vides, quod desideretur primo Anapæstus vel Spondeus, incipiens a Consonante, vel Molossus, aut Choriambus, incipiens a Vocali; Secundo Jonicus a majore, vel Anapæsto-Pyrrichius, incipiens a Consonante: Hiatus istos imple duobus Epithetis, quorum unum conveniat cum cæli, alterum cum sidera. Pro primo hiatu quære Tribraches, vel Choreos a Consonante incipientes, & invenies plurimos materiæ tuæ & hiatui accommodos. v. g. invenies inter Choreos: carus, celsus, clarus, gratus, purus &c. Inter Tribraches invenies: roseus, rutilus, superbus, stabilis, &c. vel quære Spondeos, habentes incrementum longum, vel Pæones primos vel Antibacchios a Vocali incipientes, & invenies, Absens, ingens, æthereus, Empyreus, auricomus, &c. æternus, augustus, excelsus, immensus, innubis, illustris, insignis, &c. Pro secundo hiatu implendo facile vides, quod debeas habere Epithetum, incipiens a Consonante, nisi velis elisionem facere; hoc Epithetum vel quæres inter Anapæstos, habentes incrementum longum; (nam rutilans, v. g. in accusativo plurari habet rutilantia) vel inter Spondeos, habentes incrementum longum. Inter Anapæstos habes participia: radians, rutilans, vigi-

vigilans, retinens, &c. inter Spondeos habes participia, flammans flagrans, fulgens, lucens, ſplendens, &c vel etiam quære hoc Epithetum inter Pæones tertios, declinationis tertiæ, & invenies famularis, pluvialis, &c. vel inter Jonicos a majore, & invenies: circumvagus, cryſtallinus, pellucidus, &c. tum facillima ſcribes hunc verſum ſæpiſſime variatum hoc modo.

Dum video { rutili fulgentia / ſuperi ſplendentia / roſei radiantia / clari rutilantia / grati famularia / auguſti cryſtallina / ætherei circumvaga / ingentis, &c. pellucida, &c. } ſidera cæli.

Vel etiam ita ſcribe materiam:

Ubi vides, quod primo loco debeas habere Dactylum, qui conveniat cum ſidera; hunc quære ſuo loco, & invenies: aureus, igneus, candidus, fervidus, flammeus, fulvidus, lacteus, lucidus, ſplendidus, &c. Pro ſecundo hiatu debes habere vel Jonicum a minore, vel Moloſſum, incipientes a Conſonante, tum facile ſcribes hos Verſus:

lactea dum video jucundi ſidera cæli,
candida &c. ... feſtivi, &c.

Vel ita ſcribe materiam:

-- vv-vv

§. III.

Ostenditur Praxis faciendi Disticha eleganter.

EX dictis facile constat, quam vario etiam modo Distichum fieri possit; nunc ostendendum restat, quomodo illud eleganter fieri possit. Maneamus in eadem materia: Dum video cælum desipit terra.

Primo seligenda sunt illa Epitheta, quæ Tropum aliquem involvunt & servata praxi paulo ante ostensa scribes:

Dum video accensi vigilantia sidera cæli,
Munera desipiunt litigiosa soli.

Ubi

Ubi Epithetum accensus & vigilans sunt Metaphorica, primum quidem translatum est a re inanimata ad rem inananimatam, secundum vero ab animato ad animatum. Litigiosa vero Metonymicum est; munera enim soli faciunt lites.

Secundo attendendum est ad Observationes supra positas, & ex his seligenda est illa, quæ melius præsenti materiæ convenit. Pro Hexametro cælo addes appositum: Divorum habitacula, vel præmia virtutis, vel divina palatia, &c. Pro Pentametro sermonem ad ipsam terram convertes, mutato prius desipiunt in hæc & similia Synonyma, rideo, calco, sperno, nauseo, &c. terram, terræque addes Substantivum & dices:

Dum repeto mecum, virtutis præmia, cælum.

Vel:

Dum video augustum, divina palatia, cælum:

Vel:

Dum cerno rutilum, Divorum habitacula, cælum, &c.

impia
Nauseo delicias, sordida terra, tuas,
divitias, noxia &c.

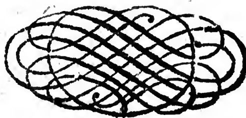

Vel:

nefanda,
Conculco fastus, terra probrosa, tuos,
scelesta,
caduca, &c.

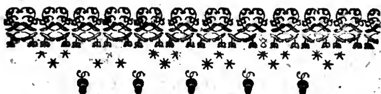

Vel per Antitheses ita:

Dum video vasti radiantia sidera cæli;
Desipiunt parvi sordida dona soli;

Ex his patet, quomodo aliud Carmen quodcunque facile & eleganter construi possit. Qui plura desiderat exempla, ipsam *Praxin Poëticam* adire poterit. Hæc in compendio attulisse sufficiat.

ÆOLI ET ÆOLIÆ DESCRIPTIO.

Nimborum in patriam loca fœta furentibus Austris
Æoliam venit. Hic vasto Rex Æolus antro
Luctantes ventos, tempestatesque sonoras
Imperio premit, ac vinclis & carcere frenat.
Illi indignantes magno cum murmure montis
Circum claustra fremunt: celsa sedet Æolus arce,
Sceptra tenens mollitque animos, & temperat iras,
Ni faciat, maria ac terras, cœlumque profundum
Quippe ferant rapidi secum, vertantque per auras,
Sed pater omnipotens speluncis abdidit atris.
Hoc metuens, molemque & montes insuper altos
Imposuit, Regemque dedit, qui fœdere certo
Et premere & laxas sciret dare jussus habenas.

Pendebat demissa chlamys, quam fibula subter
Ilia tergemino mordebat rasilis auro.
Rubraque compactis pendebant cingula bullis.
Molles a tergo, tractim succrescere plumæ,
Ac sensim geminas humeris assurgere in alas.
Tum tunicas gemmis inclusit cætera nudas.

superatus Herculi concedere est coactus. Porro cum Hercules transiturus esset Evenum, Ætoliæ fluvium, qui tum temporis maxime excreverat, Nessus Centaurus seipsum obtulit ad transvehendam Deianiram, quam cum Nesso commisisset, ipse prius intrepide tranavit fluvium. Sed cum Nessus, qui in altera remanserat ripa, novæ nuptæ vim inferre pararet, ægre id ferens Hercules, sagitta hydræ sanguine infecta Centaurum transvixit, qui se moriturum sentiens, ut hostem ulcisceretur, Deianiræ vestem proprio sanguine perfusam dono dedit. Asserens, ei vim amatoriam inesse, & si hac maritus indueretur, ipsum ab aliarum mulierum amore avocatum iri. Mulier itaque nimis credula munus accepit, & cum audisset, maritum suum in Eubœa amore Ioles, Euryti filiæ, detineri, vestem Nessi sanguine imbutam Lychæ famulo tradidit, domino suo perferendam. Hercules igitur nihil mali suspicans, cum sacrificaturus eam induisset, tantis cruciatibus affectus est, ut, in furorem versus, Lycham a Cæneo monte in euboicum mare dejecerit, qui in scopulum mutatus est. Ipse autem Hercules, arcu & sagittis Philoctetæ commissis, se in ardentem pyram in Oeta monte constructa conjecit. DESCRIPTIO ECHUS

Narcissum insequentis. Ovid. 3. Met.

Ergo ubi Narcissum per devia rura vagantem
Vidit & incaluit, sequitur vestigia furtim,
Quoque magis sequitur, flamma propiore calescit,

O quoties voluit blandis accedere dictis
Et molles adhibere preces, natura repugnat,
Nec finit, incipiat, sed quod finit, illa parata est,
Exspectare sonos ad quos sua verba remittat.
Forte puer comitum seductus ab agmine fido
Dixerat: *Et quis adest? &, adest*, responderat Echo.
Hic stupet, atque aciem partes admisit in omnes,
Voce, *Veni*, magna clamat; vocat illa vocantem.
Respicit & rursus nullo veniente. *Quid*, inquit,
Me fugis? & totidem quæ dixit verba recepit.
Perstat, & alterna deceptus imagine vocis
Huc *coëamus (ait)* nullique libentius unquam
Responsura sono, *coëamus*, rettulit Echo
Et verbis favet ipsa suis, egressaque sylva
Ibat, ut injiceret sperato brachia collo.
Ille fugit fugiensque manus complexibus aufert,
Ante (ait) *emoriar, quam sit tibi copia nostri*,
Rettulit illa nihil nisi: *Sit tibi copia nostri.*

DESCRIPTIO FAMÆ. Virg. 4. Æneid.

----Magnas it fama per urbes,
Fama, malum, quo non aliud velocius ullum,
Mobilitate viget, viresque acquirit eundo:
Parva metu primo, mox sese attollit in auras,
Ingrediturque solo, & caput inter nubila condit,
Illam terra parens ira irritata Deorum,
Extremam, ut perhibent, Cœo Enceladoque sororem
Progenuit, pedibus celerem, & pernicibus alis.
Monstrum horrendum, ingens cui quot sunt corpore plumæ,
Tot vigiles oculi subter (miserabile dictu)
Tot linguæ, totidem ora sonantia, surrigit aures.
Nocte volat cæli medio terræque per umbram,
Stridens nec dulci declinat lumina somno.
Luce sedet custos, aut summi culmine tecti,
Turribus aut altis aut magnas territat urbes,
Tam ficti, pravique tenax, quam nuntia veri.
Hæc tum multiplici populos sermone replebat.
Gaudens & pariter facta atque infecta canebat.

DESCRIPTIO FONTIS.

Ovid. 3. de Art. Am.

Est prope purpureos colles florentis Hymetti
Fons sacer & viridi cespite mollis humus,
Silva nemus non alta facit, tegit arbutus herbam:
Rosmaris & Laurus nigraque myrtus olent.
Nec densum foliis buxum, fragilesque myricæ,
Nec tenues cytisi, cultaque pinus abest,
Lenibus impulsæ Zephyris auraque salubri,
Tot generum frondes, herbaque summa tremit.

ALIA DESCRIPTIO FONTIS. Ovid. 3. Metam.

Fons erat illimis, nitidis argenteus undis,
Quem neque pastores, neque pastæ in monte capellæ
Contigerant aliudve pecus, quem nulla volucris
Nec fera turbarat, nec lapsus ab arbore ramus.
Gramen erat circa, quod proximus humor alebat,
Sylvaque, sole locum passura tepescere nullo.

DESCRIPTIO HORTI. ex Virg.

Hortus erat, junctus casulæ, quem vimina pauca
Et calamo redimita levi munibat arundo:
Exiguus spatio, variis sed fertilis herbis:
Nil illi deerat, quod pauperis exigit usus.
Hic olus, hic late fundentes brachia betæ,
Fœcundusque rumex, malvæque inulæque virebant,
Hic cicer & capiti nomen debentia cæpe.
Hic etiam nocuum capiti, gelidumque papaver,
Grataque nobilium requies lactuca ciborum,
Et gravis in latum demissa cucurbita ventrem.

DESCRIPTIO IGNIS ARTIFICIOSI.

Condiderat nox pura diem, cælumque serenis,
Lucifero spargente faces, incenditur astris.

Majus in urbe jubar, congestaque sidera lucent,
Irradiantque vias, liquidasque emissa per auras.
Pandunt nocte comas, flammæque volubilis alas,
Regalis jam tecta domus, jam mœnia longo
Ordine, jam summæ flagrant ad nubila turres,
Astraque decertant cœlestibus eminus astris. *Alex. Donat.*
Artificesque volant ignes tædæque coruscæ.
Sideris in morem tremuli, stellæque comantis,
Undique mobilibus pendent funalibus ignes.
Undique lævatis lychni specularibus ardent.
Undique felici stupa ebria lucet olivo,
Et fax in nitido scintillat fumida vitro. *Tar. Gallet.*

Inde ubi collecti rapidam diffundere pestem
Cœperunt ignes & se per pinguia magno
Patula ferre sono, clare exspatiantur in auras,

DESCRIPTIO INDOLIS PRÆCLARÆ.

En tenero quantus pueto vigor, en ut ocelli
Sideribus similes radiant, utque ora genæque,
Quanquam cognosci possit quoque mater in illis,
Plus tamen & patriæ spirant virtutis & acres
Promittunt animos, & dignas sanguine vitas,
Ipse genus, generisque sui sentire videtur
Authorem, in primo tantus vigor eminet ortu,
Ipsa etiam natura nihil neglexit in illo,
Solertique manu formatos corporis artus.
Magna anima dignum hospitium, sedemque paravit.

DESCRIPTIO INFERNI EX CHRISTIANIS POETIS.

Extremo subeunda patet spelunca barathro,
Qua non ulla magis regnis demissa profundis.
Pascit in æternas flammarum incendia pœnas,
Sulphureos alit unda lacus, atque ignibus atris
Vnda alitur glaciem juxta, resonantia juxta
Fluctibus allisis, vastaque voragine saxa.
Luctus ibi planctusque virum gemitusque nocentum
Verberaque ingeminant, quassatque immane caverna
Horror, et ora dolor redeuntibus obsider alis:
Hoc immersi omnes quicunque ferocibus ausis
Bella sacris fecere, jacentque dolentque Nerones;
Corpora ter centum rigidis percussa catenis.
Perpetuis ardere rogis, clavaque sonora
Centauros fremere, & spiris religantibus Hydras. *P. Alex. Donat.*
Omnia funestis operit nox atra tenebris,
Horridaque offusum retro agit umbra diem.
Claudirur æratis circum undique & undique muris,
Fertatasque ligant vincula mille fores,
Obsidet hospitium gravis illætabile mœror,
Et socia æternus cum legione dolor.
Intus agit picei rogus atra volumina fumi,
Sulphureamque domus tota Mephitin alit.
Ignea densatis in aheno carcere flammis
Regnat, & Ætnæo plus furit aute foco.
Urimur hoc semper, semperque renascimur igni,
Quoque necesse mori est, non licet igne mori. *P. Iac. Biderm.*

DESCRIPTIO INUNDATIONIS. Ovid. 10. Metam.

Intremuit (*terra*) motuque vias patefecit aquarum,
Exspatiata ruunt per apertos flumina campos,
Si qua domus mansit, potuitque resistere tanto
Indejecta malo, culmen tamen altior hujus
Unda tegit, pressæque latent sub gurgite turres.
Omnia pontus erant, deerant quoque littora ponto:
Occupat hic collem, cymba sedet alter adunca,
Et ducit remos illic ubi nuper ararat,
Ille super segetes, aut mersæ culmina villæ
Navigat, hic summa piscem deprendit in ulmo,
Figitur in viridi (sic sors tulit) anchora prato,
Et modo, qua graciles gramen carpsere capellæ,
Nunc ibi deformes ponunt sua corpora Phocæ.
Mirantur sub aqua lucos, urbesque domosque
Nereides, sylvasque tenent Delphines & altis
Incursant ramis agitataque robora pulsant.

Nat lupus inter oves, fulvos vehit unda leones,
Quæsitisque diu terris ubi sistere possit,
In mare lassatis volucris vaga decidit alis.
Obruerat tumulos immensa licentia ponti,
Pulsabantque novi montana cacumina fluctus.

DESCRIPTIO HOMINIS IRATI.

-------- Dixit atque ira furit.
Ardent minaces igne truculento genæ,
Oculique vix ſe ſedibus retinent ſuis,
Violentus, audax, mutus, iratus, ferox.
Tantum cruentus gemuit, & dirum fremens
Manus in ora torſit. *Senec. in Oed.*
Sic memorans torquet fumantem ex ore vaporem,
Iraque anhelatum proturbat pectore murmur:
Ut multo accenſis fervore exuberat undis,
Clauſus exuſto liquor indignatur aheno.
Tum præceps aut in medium, cælumque fatigat. *Silvius. L. 6.*

DESCRIPTIO DUORUM INTER SE LUCTANTIUM.

Talia dicentem, (*me*) jam dudum lumine torvo
Spectat, & accensæ non fortiter imperat iræ,
Verbaque tot reddit: melior mihi dextera lingua est,
Dummodo pugnando superem, tu vince loqnendo,
Congrediturque ferox; puduit modo magna locutum.
Cedere, rejeci viridem de corpore vestem,
Brachiaque opposui tenuique a pectore veras
In statione manus, & pugnax membra paravi,
Et modo cervicem, modo crura micantia captat,
Aut captare parat, omnique a parte lacessit.
Me mea defendit gravitas, frustraque petebat:
Haud secus ac moles, quam magno murmure fluctus
Oppugnat, manet illa, suoque est pondere tuta:
Digredimur paulum rursusque ad bella coimus,
Inque gradu stetimus certi non cedere, eratque
Cum pede pes junctus, totoque ego pectore pronus,
Et digitos digitis, & frontem fronte premebam.
Non aliter vidi fortes concurrere tauros. *Ovid.* 9. *Metam.*

DESCRIPTIO NAUFRAGII.

Virg. 1. Æneid.

—— Stridens Aquilone procella
Velum adversa ferit fluctusque ad sidera tollit.
Franguntur remi, tum prora avertit, & undis
Dat latus, insequitur cumulo præruptus aquæ mons.
Hi summo in fluctu pendent, his unda dehiscens
Terram inter fluctus aperit: furit æstus arenis.
Tres Notus abreptas in saxa latentia torquet.
—— Tres Eurus ab alto
In brevia & syrtes urget (miserabile visu)
Illiditque vadis, atque aggere cingit arenæ.
Unam quæ Lycios fidumque vehebat Orontem,
Ipsius ante oculos ingens a vertice pontus
In puppim ferit excutitur pronusque magister
Volvitur in caput, ast illum ter fluctus ibidem
Torquet agens circum & rapidus vorat æquore vortex,
Apparent rari nantes in gurgite vasto.
Arma virum, tabulæque & Troja gaza per undas.

Nobiles olim Romæ habebantur, quorum Majores Magistratum curulem gesserant, atque horum imagines cera impressas collocabant in atriis suis in argumentum Nobilitatis. Quando Poëtæ gravem odorem volunt exprimere, utuntur præcipue his vocabulis: Mephitis, Hircus, Nanre, *porro* Mephitis, *fœtor corruptus aëris, quæ a vertendo cloacarum Dea, ſub nomine* Mephitis, *a Romanis culta fuit.* Nante *eſt fœtida aqua ſentina. Poetæ inter notas divinitatis censent suavem odorem, ut non uno in loco videre est apud Virg. & Ovid De Venere ita canit:

—— tenues succeffit in auras,
Mansit odor; posses scire fuisse Deam.

Ascititius odor reddebat olim homines contemptibiles, tum quo crederentur illi velle tegere ingratum odorem, tum quod essent homines effeminati & molles, unde est illud antiquum: Bene olet, qui nihil olet. *Et illud Martialis Epigramma:*

COMPARATIONES.

1. *Comparat Ovidius pallentem cum* vase argenteo, & novo marmore:

Concidimus macie, color est sine sanguine:
Forma novi talis *marmoris* esse solet.
Argenti color est inter convivia talis,
Quod tactum gelidæ frigore pallet aquæ.

8. *Et sæpissime cum* frondibus frigore perculsis: *item cum* malis Cydoni *maturis* & prunis immaturis *idem pallidum comparat*:
Palluit, ut sacræ lectis de vite racemis
Pallescunt frondes, quas nova læsit hiems.
Quæque suos curvant matura Cydonia ramos,
Cornaque adhuc nostris non satis apta cibis.
9. *Cum* nova cera:
Parvus in exiles succus mihi pervenit artus,
Membraque sunt cera pallidiora nova.
Atque in his persona comparatur rebus: ab aliis poetis etiam persona personis conferuntur, ut ab Ovidio, ut fecit, Valer. Flac. L. 3.
----- Tum vero & pallor & amens
Cum piceo sudore rigor: ceu pectora Nautis
Congelat hiberni vultus Jovis, Agricolisve,
Cum coit umbra minax. *Item Juven.*

DESCRIPTIO PARADISI.

Quæ servire poterit ad describendum locum alium amœnum.

Non humiles istic curæ, non vilis egestas,
  Non parit alternas menstrua luna vices.
Non vitam duræ rapit inclementia mortis,
  Non properat celeri curva senecta pede.
Sed nivei sine labe dies ducuntur in ævum,
  Ducitur & dulci flore juventa viret.
Culmina non istic rigida vestita pruina,
  Aut nemorum duris brachia tonsa notis.
Ast hilaris vernæ patet indulgentia lucis,
  Et rubet assyriis prodiga terra rosis.
Arvaque luxuriant Zephyro fœcunda magistro,
  Subdita nec solito mollia prata modo.
Umbrosumque nemus, Platanosque per obvia nexas,
  Insilit & grato carmine mulcet avis.
Sponte sua fruges, & sponte resurgit Amomum,

Indicium rubor eſt & ductus anhelitus igni.
Aſpera lingua tumet, tepidisque arentia ventis
Ora patent auræque graves gravantur hiatu,
Non ſtratum, non ulla pari velamina poſſunt:
Tantaque ſunt miſeris inviſi tædia lecti.
Proſiliunt aut ſi prohibent conſiſtere vires,
Corpora devolvunt in humum fugiuntque penates
Quisque ſuos, ſua cuique domus funeſta videtur.

En ſubito violenta lues (mirabile viſu)
Agmina corripuit, ferroque minacior acri.
Sternit humi juvenes validos, & inertia vulgo

Afflatusque vetat lenes undasque ſalubres,
Cunctaque prævitiant lato contagia morbo.
Cernit paſtor oves crudeli ſtrage peremptas.
Audacesque dolet tauros occumbere campo.
Inter opus medium, glebisque perire ſolutis,
Nec minus ad miſeros peſtis veſana colonos

Illis ora patent tepidis arentia ventis,
Suffuſæque natant nares, & ſanguine fauces

DESCRIPTIO PHILOMELÆ canentis.

-- ----- ------ modo namque æquabilis uno
Assurgit tractu, gutturque volubile longo
Lubricat impulsu, facilesque expectorat aures,
Difficiles numeros modo colluctata retorquet,
Infuscat, scindit, carpitque ac plurima mutat,
Plurima dum mutat surgit symphonia discors,
Quando poscit hymen liquidos puri aeris haustus
Projicit, absorbetque iterum jaculabile murmur.
At quo intra fauces subigit, tacitumque choreum
Delibrat, donec campo prorumpat aperto,
Una eademque canit toties distincta venitque
Obvia sæpe sibi, nonnunquam adversa caditque,
Ac fugit vocemque premit, vocemque coruscat,
Quod si festa ducis subeant connubia novit,
Novit & ipsa suos ad pompam augere tumultus,
Erigitur sublime ruens, rostroque perorat
Fulius, e rostris credat præsagia dici,
Jamque ut lympha sonat, quæ cursus immemor arva
Radit & inventos divexat rore lapillos.
Jam majore modo turgens viventis ad instar
Fluminis Aonidum lapsus imitatur aquarum,
Et sua Pegaseis stipat præcordia bullis, &c.

Frangitur, inque sinus scindit sese unda reductos.

Non horrenda rugis, forma pulcherrima virgo, praestanti corpore virgo, in cujus egregio decus enitet ore. Forma praestante puella, inter virgineos longe pulcherrima coetus. Forma nulli cessura Dearum, quae laeto splendore micat, cujus corpus nulla litura notat, habens candidulos humeros et eburnea colla. Clarissima Forma. Multorumque fuit spes invidiosa procorum. Candidior folio nivei galatea ligustri, floridior prato, longa procerior alno, splendidior vitro, platano conspectior alta, lucidior glacie, rigua formosior horto, non labra rosae, non colla pruinae, non crines aequant violae, non lumina flammae. Quanto splendidior quam caetera Sidera fulget Lucifer, et quanto quam Lucifer aurea Phoebe, tanto virginibus praestantior omnibus Hersie ibat, eratque decus pompae comitumque suarum, sunt mihi bis septem praestanti corpore Nymphae. Magna quidem de te rumor praeconia fecit, nullaque de facie nescia terra tua est, nec tibi par usquam Phrygiae, nec Solis ab ortu, inter formosas altera nomen habet qua gratior ore nonduit, Lucifer ut nitidos producit in aethere vultus clarior, et laetus nuntiat ore, diem, ornat eundo polum, terris quoque lampada mittit, atque inter stellas lumine regna tenet. Sic tu diffundens formoso lumina vultu, foemineo vincis pulchrior ore choros, est in te facies et laudatissima forma. O Facies oculis insidiosa meis. Fulgentior auro quolibet, et Solis radiis factura pudorem. Lumina quid referam praeclarae subdita fronti, invidiam motura Diis divina quod illis vis inerat, radiansque decor qua pectora posset flectere, quo vellet. *v. Pulcher.*

DESCRIPTIO REGIÆ SOLIS. Ovid. 2. *Metam.*

Regia Solis erat sublimibus alta columnis,
Clara micante auro flammasque imitante Pyropo,
Cujus ebur nitidum fastigia summa tegebat,
Argenti bifores radiabant limine valvæ,
Materiam superabat opus.

Clara micante auro flammasque imitante Pyropo,
Cujus ebur nitidum fastigia summa tegebat,
Argenti bifores radiabant limine valvæ.

Eripio innocuos, vitam miserata labantem.
Ira mihi regum cedit populique frementis
Seditio, posito cedit Bellona flagello,
Et furor, & versis discordia mobilis armis.

Me decorant falces, & pacto purpura textu,
Gloriaque & populi plausus comitantur euntem.

O quis latinæ fons opulentiæ
Exuberanti vividus impetu
Bacchatur, & lymphata secum
Corda rapax animosque volvit.
Qui nunc profundo volvitur alveo
Sententiarum, nunc glacili fluit,
Torrent linguæ, nunc apertis
Ingenii spatiatur arvis,

Exire ripam, non tamen invida
Cantivus alga, nec tenaci
Ire piget per aprica limo.

Descriptio Saculi aurei.

Quam bene Saturno vivebant Rege priusquam
  Tellus in longas est patefacta vias,
Nondum cæruleas pinus contempserat undas,
  Effusum ventis præbueratque sinum.
Nec vagus, ignotis repetens compendia terris,
  Presserat externa navita merce ratem,
Illo non validus subiit juxta tempore taurus.
  Non domito frenos ore momordit equus.
Non domus ulla fores habuit. Non fixus in agro,
  Qui regeret certis finibus arva, lapis.
Ipsæ mella dabant quercus, ultroque ferebant
  Obvia securis ubera lactis oves.
Non acies, non ira fuit: non bella, nec enses
  Immiti sævus duxerat arte faber. (*Tibul.*)

Non tamen aut tectis ſonuerunt curſibus amnes
Aut micuere novi percuſſo pumice fontes:
Antra nec exiguo ſtillant ſudantia rore,
Aut impulſa levi turbantur glarea vena.
Tunc exhauſta ſuper multo ſudore juventus
Extrahitur duris ſilicum laſſata metallis;
Quoque minus ſiccos poſſent tolerare vapores,
Quæſitæ felicis aquæ manus utraque glebas
Exprimit, ora ſuper: nigro ſi turbida limo
Colluvies immota jacet, cadit omnis in hauſtus
Certatim obſcœnos miles moriensque recepit,
Quas nollet victurus aquas: rituque ferarum
Diſtentas ſiccans pecudes & lacte negato

SOMNI AULA. *Ovid.* 11. *Metam.*

Est prope Cimmerios longo spelunca recessu,
Mons cavus, ignavi domus & penetralia Somni:
Quo nunquam radiis oriens, mediusve cadensve
Phœbus adire potest, nebulæ caligine mistæ
Exhalantur humo, dubiæque crepuscula lucis.
Non vigil ales ibi cristati cantibus oris
Evocat Auroram, nec voce silentia rumpunt,
Sollicitive canes, canibusque sagacior anser,
Non fera, non pecudes, non moti flamine rami,
Humanæve sonum reddunt convicia linguæ,
Muta quies habitat: saxo tamen exit ab imo
Rivus aquæ lethes, per quem cum murmure labens
Invitat somnos crepitantibus unda lapillis,

Ante

Ante fores antri fœcunda papavera florent,
Innumeræque herbæ quarum de lacte soporem
Nox legit, & spargit per opaces humida terras,
Janua ne versa stridorem cardine reddat,
Nulla domo tota est, custos in limine nullus.
Ast medio torus est ebeno sublimis in antro,
Plumeus unicolor, pullo velamine tectus,
Quo cubat ipse Deus, membris languore solutis,
Hunc circa passim, varias imitantia formas
Somnia vana jacent totidem quot messis aristas,
Sylva gerit frondes, ejectat littus arenas, &c.

DESCRIPTIO SPEI, ex Ovid. 1. de Ponto.

Hæc Dea cum fugerent sceleratas Numina terras,
  Ex Diis invisa sola remansit humo,
Hæc facit, ut vivat fossor quoque compede vinctus,
  Liberaque a ferro crura futura putet.
Hæc facit, ut videat, cum terras undique nullas,
  Naufragus in mediis brachia jactet aquis.
Sæpe aliquem solers medicorum cura reliquit,
  Nec spes huic venia deficiente cadit.
Carcere dicuntur clausi sperare salutem,
  Atque aliquis pendens in cruce vota facit.
Hæc Dea, quam multos laqueo sua colla ligantes,
  Non est proposita passa perire nece.

DESCRIPTIO terræ sterilis ex Philom. in Mus. Juven.

Improba cunctarum rerum comitatur egestas:
Spem mentitus ager toto non horrea lustro
Implevit, steriles dominantur lappulæ in arvis,
Et lolium nocuo perfundens membra sopore.
Non ver purpureum redolentia gramina promit,
Aut florum pleno diffundit copia cornu,
Arida nequicquam placidos dum postulat imbres,
Torretur nimium Phœbo rimisque fatiscit,
Inque vicem immani pulsatur grandine tellus,

DESCRIPTIO TEMPESTATIS. Ovid, 12. *Metamorph.*

—— Mare ſub noctem tumidis albeſcere cœpit
Fluctibus, & præceps ſpirare valentius Eurus;
Aſpera creſcit hyems omnique a parte feroces
Bella gerunt venti, fretaque indignantia miſcent.
Ipſe pavet, nec ſe, quis ſit ſtatus, ipſe fatetur,
Scire ratis rector, nec quid jubeatve, velitve:
Tanta mali moles tantoque potentior arte eſt.
Quippe ſonant clamore viri, ſtridore rudentes;
Undarum incurſu gravis unda, tonitrilus æther:
Fluctibus erigitur, cœlumque æquare videtur
Pontus & inductas aſpergine tangere nubes.
Sæpe dat (*navis*) ingentem fluctu latus icta fragorem;
Jamque labant cunei ſpoliataque tegmine ceræ
Rima patet, præbetque viam lethalibus undis,
Ecce, cadunt largi reſolutis nubibus imbres,
Inque fretum credas totum deſcendere cœlum;
Inque plages cœli tumefactum aſcendere pontum:
Vela madens nimbis, & cum cœleſtibus undis
Æquoreæ miſcentur aquæ: caret ignibus æther,
Cæcaque nox premitur tenebris hyemisque ſuisque,
Diſcutiunt tamen has præbentque micantia lumen
Fulmina, fulmineis ardeſcunt ignibus undæ.
Deficit ars animique cadunt, totidemque videntur,
Quot veniunt fluctus, ruere, atque irrumpere montes,
Non tenet hic lacrymas, ſtupet hic, vocat ille beatos, &c.

COMPARATIO TEMPORIS CUM FLUVIO.

Ovid. 15. Metam.

Ipsa quoque assiduo labuntur tempora motu,
Non secus ac flumen: neque enim consistere flumen.
Nec levis hora potest, sed ut unda repellitur unda,
Urgeturque prior veniente urgetque priorem,
Tempora sic fugiunt pariter, pariterque sequuntur.
Et nova sunt semper: nam, quod fuit ante, relictum est.
Fitque quod haud fuerat, momentaque cuncta novantur.

DESCRIPTIO TRIUMPHI.
Ovid. Trist. 4.

Ergo omnis populus poterit spectare triumphos,
Cumque ducum titulis oppida capta leget:
Vinclaque captiva Reges cervice gerentes
Ante coronatos ire videbit equos,
Et cernet vultus, aliis pro tempore versos,
Terribiles aliis immemoresque sui.
Quorum pars causas & res, & nomina quæret,
Pars referet, quamvis noverit illa parum.
Hi lacus, hi Montes, hæc tot Castella, tot Amnes
Plena feræ cædis, plena cruoris erant.
Cornibus hic fractis viridi male tectus ab ulva,
Decolor ipse suo sanguine Rhenus erat,
Crinibus en etiam fertur Germania passis,
Et ducis invicti sub pede mœsta sedet.
Semper in hoc curru Cæsar victore veheris
Purpureus, populi rite per ora tui, &c.
